PROFESSIONAL SUMMARY

Results-driven Cloud & DevOps Engineer with 3+ years of enterprise experience building secure, highly-available DevSecOps pipelines and cloud-native platforms on AWS and GCP. Delivered production-grade infrastructure for global clients including Google, automating end-to-end workflows — from extension security analysis and AI/ML workload deployment to multi-cloud Kubernetes orchestration and FinOps governance. Deep expertise in Kubernetes (EKS/GKE), Terraform IaC, Jenkins & GitHub Actions CI/CD, ArgoCD GitOps, and full-stack observability (Prometheus/Grafana). Proven track record of reducing deployment lead time by 65%, MTTR by 40%, and cloud infrastructure costs by 30%. GCP Associate Cloud Engineer and AWS Solutions Architect – Associate certified.

TECHNICAL SKILLS

Cloud Platforms	AWS (EC2, EKS, ECR, S3, IAM, VPC, ALB, CloudWatch, Lambda, EventBridge) GCP (GKE, Artifact Registry, Cloud Run, Vertex AI, Cloud Storage, Cloud Monitoring, IAM)
Containers & Orchestration	Docker, Kubernetes (EKS, GKE), Helm Charts, ArgoCD (GitOps), Kustomize, NGINX Ingress Controller, HPA
IaC & Automation	Terraform, Ansible, AWS CloudFormation, Shell Scripting, Python
CI/CD & DevSecOps	Jenkins, GitHub Actions, GitLab CI, GitFlow, SonarQube (SAST), OWASP Dependency-Check, Trivy, Policy-as-Code
AI / ML Ops	GCP Vertex AI (NLP, conversational AI), OpenAI API integration, AI workload containerization on GKE, model serving pipelines
Monitoring & SRE	Prometheus, Grafana, AWS CloudWatch, GCP Cloud Monitoring, PagerDuty, DORA Metrics, MTTR/MTTD, SLO/SLA management
Networking & Security	VPC, Subnets, ALB/NLB, NGINX Ingress, SSL/TLS, IAM Roles & Policies, Security Groups, Service Accounts, Workload Identity
FinOps & Governance	AWS Lambda-based cost automation, EBS lifecycle management, resource tagging, cloud spend optimization
Languages & Databases	Python, Bash/Shell, JavaScript MySQL, PostgreSQL, MongoDB
OS & Practices	Linux, Agile/Scrum, GitFlow, Shift-Left Security, Zero-Downtime Deployments

PROFESSIONAL EXPERIENCE

Associate Software Engineer · Cognizant Technology Solutions · Hyderabad, Telangana

July 2022 – Present

- Engineered multi-cloud infrastructure across AWS and GCP for 3 enterprise client engagements, supporting 99.9% uptime SLA for production microservices handling high-volume workloads.
- Automated infrastructure provisioning end-to-end using Terraform IaC — delivering EKS/GKE clusters, VPCs, IAM roles, and Auto Scaling Groups with zero manual intervention.
- Architected Jenkins and GitHub Actions CI/CD pipelines with integrated DevSecOps toolchain (SonarQube SAST, OWASP Dependency-Check, Trivy scanning), reducing post-deployment defects by 35%.
- Deployed and operated Kubernetes workloads (Deployments, HPA, NGINX Ingress, ConfigMaps, liveness/readiness probes) on EKS and GKE; reduced pod crash recovery time by 50%.

- ▶ Established full-stack observability using Prometheus + Grafana, AWS CloudWatch, and GCP Cloud Monitoring — reduced MTTR by 40% and enabled proactive capacity planning.
- ▶ Implemented GitOps-based continuous delivery via ArgoCD, reducing deployment lead time and enabling instant rollback on production incidents.
- ▶ Led Agile sprint deliveries for cross-functional teams, enforcing GitFlow branching strategy and zero-downtime rolling deployments with automated rollback triggers.

KEY PROJECTS

1. Google CWS — Chrome Extension DevSecOps Automation Platform

GCP · GKE · Jenkins · Terraform · ArgoCD · Helm · SonarQube · Trivy · OWASP · Prometheus · Grafana · Vertex AI

- ▶ Designed a multi-stage Jenkins CI security pipeline integrating SonarQube SAST, OWASP Dependency-Check, and Trivy scanning for malicious payload detection — reducing manual review effort by ~60%.
- ▶ Provisioned production GCP infrastructure using Terraform IaC with remote state in Cloud Storage — including GKE cluster, VPC, IAM service accounts with Workload Identity, and Artifact Registry.
- ▶ Integrated GCP Vertex AI NLP capabilities into the pipeline for intelligent extension metadata analysis and ML-driven classification of high-risk extension patterns.
- ▶ Deployed a Prometheus + Grafana observability stack monitoring extension submission throughput, pipeline SLOs, and security gate pass/fail rates.

2. AWS Cloud FinOps — Event-Driven Serverless Cost Governance Automation

AWS Lambda · Python · Boto3 · EventBridge · CloudWatch · EBS · IAM · S3 · EC2

- ▶ Designed a serverless FinOps automation framework using AWS Lambda (Boto3) to identify and remediate stale EBS snapshots from deleted EC2 instances, demonstrating 100% accuracy in test environments.
- ▶ Automated governance via CloudWatch EventBridge scheduler (daily trigger), creating a zero-touch cost hygiene mechanism requiring no manual intervention.
- ▶ Architected the solution as an extensible FinOps framework applicable to S3 lifecycle policies, idle RDS instances, and unattached EIPs, delivering a reusable cost governance pattern.
- ▶ Produced executive-ready cost reporting via CloudWatch dashboards, enabling monthly cloud spend visibility for FinOps governance.

3. BlueBolt — End-to-End DevSecOps for MERN Stack on AWS EKS

AWS EKS · ECR · Terraform · Jenkins · ArgoCD · Helm · NGINX Ingress · Route 53 · ALB · Prometheus · Grafana · SonarQube · Trivy · OWASP

- ▶ Provisioned private AWS infrastructure (VPC, EKS with managed node groups, IAM roles with OIDC, ALB, Auto Scaling Groups) using modular Terraform executed via Jenkins orchestration.
- ▶ Built Jenkins CI pipelines with SonarQube quality gates, OWASP and Trivy scanning, ECR push with commit-SHA tagging, and automated Kubernetes manifest updates for GitOps sync.
- ▶ Built separate Jenkins CI pipelines for frontend and backend services with comprehensive DevSecOps stages: SonarQube quality gate enforcement (blocking merge on critical issues), OWASP dependency scanning, Trivy filesystem and container image scanning, ECR push with commit-SHA image tagging, and automated Kubernetes manifest update for GitOps sync.
- ▶ Configured ArgoCD for self-healing GitOps continuous delivery, reconciling new image tags to EKS with zero-downtime rolling deployments and sub-5-minute rollback.
- ▶ Deployed AWS ALB Ingress Controller via Helm, integrated with Route 53 and ACM-managed SSL for secure HTTPS traffic termination.

4. GCP Cloud Run — Containerized Node.js Deployment via Terraform & GitHub Actions

GCP Cloud Run · Terraform · GitHub Actions · Artifact Registry · Cloud Storage · Cloud DNS · SSL/TLS · Trivy

- ▶ Automated full-lifecycle deployment of a containerized Node.js microservice via a 5-stage GitHub Actions pipeline and Terraform IaC, triggered on every push/PR to main.
- ▶ Implemented idempotent Terraform scripts with GCS remote state backend, detecting existing Cloud Run state to provision fresh infrastructure or perform in-place updates.
- ▶ Configured Cloud DNS routing with GCP-managed SSL/TLS certificates, eliminating third-party certificate management overhead.
- ▶ Validated disaster recovery by simulating infrastructure deletion and confirming full automated re-provisioning within a single pipeline execution.

5. Wellness Health Buddy — AI Chatbot DevSecOps Deployment on AWS EKS

AWS EKS · Jenkins · Terraform · Docker · SonarQube · Trivy · OWASP · Kubernetes · OpenAI API · S3

- ▶ Architected and deployed an OpenAI-powered conversational AI chatbot on AWS EKS within a 48-hour hackathon, applying full DevSecOps practices.
- ▶ Designed a two-pipeline Jenkins architecture: application CI (SonarQube, OWASP, Trivy scanning, DockerHub push) and EKS cluster lifecycle management via parameterized Terraform apply/destroy.
- ▶ Provisioned an AWS EKS cluster with Terraform (S3 backend) and deployed the chatbot via Kubernetes Deployment manifests with a LoadBalancer Service.
- ▶ Integrated OpenAI API for real-time conversational responses, containerized on Node.js, with zero-downtime rolling updates.

EDUCATION

- ▶ **B.Tech — Computer Science & Engineering**

Sep 2018 – Aug2022

RVR & JC College of Engineering · Guntur, Andhra Pradesh

CERTIFICATIONS

- ▶ Google Cloud Associate Cloud Engineer (GCP ACE) — Google Cloud
- ▶ AWS Certified Solutions Architect – Associate (SAA-C03) — Amazon Web Services
- ▶ AWS Certified Cloud Practitioner (CCP) — Amazon Web Services
